Volume Contents

Volume 22 Number 1

J. Ginibre and G. Velo	1	Regularity of solutions of critical and subcritical nonlinear wave equations
A. Lorenzi	21	An identification problem related to a nonlinear hyperbolic integro-differential equation
E. Serra and S. Terracini	45	Noncollision solutions to some singular minimization problems with Keplerian-like potentials
Dang Dinh Ang and R. Gorenflo	63	On nondegenerate and degenerate nonlinear Abel integral equations of the first kind
H. Gajewski	73	On a variant of monotonicity and its application to differential equations
N. U. Ahmed and X. Xiang	81	Existence of solutions for a class of nonlinear evolution equations with nonmonotone perturbations
C. Mao, S. Reich and I. G. Rosen	91	Approximation in the identification of nonlinear degenerate distributed parameter systems

Volume 22 Number 2

U. Ledzewicz and S. Walczak	121	On the Lusternik theorem for nonsmooth operators
S. Luckhaus and S. Zheng	129	A nonlinear boundary value problem involving a nonlocal term
J.-M. Roquejoffre and D. Terman	137	The asymptotic stability of a traveling wave solution arising from a combustion model
M. Tsutsumi and S. Hatano	155	Well-posedness of the Cauchy problem for the long wave–short wave resonance equations
B. Mordukhovich	173	Lipschitzian stability of constraint systems and generalized equations

G. Beer	207	Wijsman convergence of convex sets under renorming
P. Kelevedjiev	217	Existence of solutions for two-point boundary value problems
P. Kelevedjiev	225	Nonexistence of solutions for two-point boundary value problems
A. El Hachimi and J.-P. Gossez	229	A note on a nonresonance condition for a quasilinear elliptic problem
Ding Yanheng	237	A remark on the linking theorem with applications

Volume 22 Number 3

M. N. Nkashama	251	Density condition at infinity and resonance in nonlinear elliptic partial differential equations
J. R. Haddock and M. N. Nkashama	267	Periodic boundary value problems and monotone iterative methods for functional differential equations
K. Sugimura	277	Existence of infinitely many solutions for a perturbed elliptic equation with exponential growth
Yubo Chen and Wan Zhuang	295	On monotone iterative method for periodic boundary value problems of nonlinear integro-differential equations
E. N. Dancer and C. P. Gupta	305	A Liapunov-type result with application to a Dirichlet-type two-point boundary value problem at resonance
P. E. Zhidkov	319	An invariant measure for a nonlinear wave equation
T. Lachand-Robert	327	Bifurcation and symmetry breaking in a nonlinear elliptic equation in a cylinder
K. Thews	347	On a topological obstruction to regular forms of stability
P. Felmer and R. Manásevich	353	A global approach for bifurcation from a nondegenerate periodic solution
W. E. Fitzgibbon and M. E. Parrott	363	Convergence of singularly perturbed Hodgkin–Huxley systems
V. Lakshmikantham and N. S. Papageorgiou	381	Cone-valued Lyapunov functions and stability theory

Volume 22 Number 4

A. Braides and V. Chiadò Piat	391	Remarks on the homogenization of connected media
V. Chiadò Piat and F. Serra Cassano	409	Relaxation of degenerate variational integrals
A. Castro and G. Sudhasree	425	Uniqueness of stable and unstable positive solutions for semi-positone problems
C. McMillan and R. Triggiani	431	Min-max game theory and algebraic Riccati equations for boundary control problems with analytic semigroups—II. The general case
P. Klouček	467	On the existence of the entropic solution for the transonic flow problem
J. Garcia Azorero, I. Peral Alonso and J. P. Puel	481	Quasilinear problems with exponential growth in the reaction term
V. Lakshmikantham, S. Leela and S. Kaul	499	Comparison principle for impulsive differential equations with variable times and stability theory
C. Bardaro and G. Vinti	505	General convergence theorem with respect to Cesari variation and applications
S. Koike	519	Uniqueness of viscosity solutions for monotone systems of fully nonlinear PDEs under Dirichlet condition

Volume 22 Number 5

P.-A. Vuillermot	533	Almost-periodic attractors for a class of nonautonomous reaction–diffusion equations on $\mathbb{R}^N$—III. Center curves and Liapounov stability
A. C. Bryan and A. E. G. Stuart	561	Representations of the multisoliton solutions of the Korteweg–de Vries equation
N. Hirano and N. Mizoguchi	567	Existence of solutions of minimal period of semilinear elliptic equations on strip-like domains
J. Carrillo	573	On the uniqueness of the solution of the evolution dam problem
S. L. McMurran	609	Expansive functions and quasilinear Jacobi differential equations

B. SCARPELLINI 625 Bounded solutions of parabolic equations in unbounded domains

Y.-H. WAN 649 Product normal forms for families of symplectic maps with symmetries

Volume 22 Number 6

H. OUNAIES 675 Perturbation of planar, Keplerian Hamiltonian systems

A. ACKER 697 On the uniqueness, monotonicity, starlikeness, and convexity of solutions for a nonlinear boundary value problem in elliptic PDEs

R. SRZEDNICKI 707 Periodic and bounded solutions in blocks for time-periodic nonautonomous ordinary differential equations

L. G. BLAINE 739 Subharmonic solutions of periodically forced predator–prey systems

S. JIMBO and Y. MORITA 753 Stability of nonconstant steady-state solutions to a Ginzburg–Landau equation in higher space dimensions

P. D. LOEWEN and H. ZHENG 771 Generalized conjugate points for optimal control problems

R. KANNAN, R. K. NAGLE and K. L. POTHOVEN 793 Remarks on the existence of solutions of $x'' + x + \arctan(x') = p(t)$; $x(0) = x(\pi) = 0$

Volume 22 Number 7

A. F. NEVES and J. L. BOLDRINI 797 Periodic motions of sucker rod pumping systems

P. MICHEL and J.-P. PENOT 809 Second-order moderate derivatives

C. QIAN 823 On global asymptotic stability of second order nonlinear differential systems

T. COLIN 835 On the Cauchy problem for dispersive equations with nonlinear terms involving high derivatives and with arbitrarily large initial data

Z. LU and Y. TAKEUCHI 847 Permanence and global attractivity for competitive Lotka–Volterra systems with delay

MENG SU and HONG-KUN XU 857 Solutions of nonlinear operator equations in Banach spaces with application

T. H. Otway 867 Accumulation-point singularities of low-energy gauge fields

P. R. Wolenski 875 Hamilton–Jacobi theory for hereditary control problems

T. Hishida 895 Asymptotic behavior and stability of solutions to the exterior convection problem

Volume 22 Number 8

P. Seibert and J. S. Florio 927 On the foundations of bifurcation theory

R. D. Nussbaum 945 Lattice isomorphisms and iterates of nonexpansive maps

L. T. Grujić 971 Complete exact solution to the Lyapunov stability problem: time-varying nonlinear systems with differentiable motions

M. Oberguggenberger and Y.-G. Wang 983 Reflection of delta-waves for nonlinear wave equations in one space variable

A. Zitan and R. Ortega 993 Existence of asymptotically stable periodic solutions of a forced equation of Lienard type

E. Yanagida and S. Yotsutani 1005 Existence of nodal fast-decay solutions to $\Delta u + K(|x|)|u|^{p-1}u = 0$ in R^n

J. Hofbauer and J.W.-H. So 1017 Competition in the gradostat: the global stability problem

J. Duan and P. Holmes 1033 On the Cauchy problem of a generalized Ginzburg–Landau equation

D. Ralph 1041 On branching numbers of normal manifolds

Junyu Wang 1051 A singular nonlinear boundary value problem for a higher order ordinary differential equation

Volume 22 Number 9

A. N. Carvalho and L. A. F. Oliveira 1057 Delay–partial differential equations with some large diffusion

J. Garcia-Falset 1097 Fixed point property in Banach lattices with Banach–Saks property

S. Shao	1105	Boundary and interior layer behavior in a time-dependent singularly perturbed system
Shunian Zhang	1121	Stability of infinite delay difference systems
P. Ch. Tsamatos and S. K. Ntouyas	1131	Existence and uniqueness of solutions for boundary-value problems for differential equations with deviating arguments
E. Lami Dozo and M. C. Mariani	1147	The prescribed mean curvature equation with Neumann condition
A. T. Cousin	1153	Regular solutions of a nonlinear model for vibrations of beams in unbounded domains
N. Kenmochi and M. Niezgódka	1163	Evolution systems of nonlinear variational inequalities arising from phase change problems
Corrigendum	1181	

Volume 22 Number 10

C. Mariconda	1183	On a variational problem of slow growth without convexity assumptions
B. M. Glover, V. Jeyakumar and W. Oettli	1191	Solvability theorems for classes of difference convex functions
A. Dikansky	1201	Galerkin approximations to the nonautonomous periodic reaction–diffusion equations
S. Zhang	1209	Boundedness of infinite delay difference systems
B. Gustafsson and M. Sakai	1221	Properties of some balayage operators, with applications to quadrature domains and moving boundary problems
P. Soravia	1247	Generalized motion of a front propagating along its normal direction: a differential games approach
S. Kaul, V. Lakshmikantham and S. Leela	1263	Extremal solutions, comparison principle and stability criteria for impulsive differential equations with variable times
H. J. Li and C. C. Yeh	1271	Existence of positive nondecreasing solutions of nonlinear difference equations
H. Beirão da Veiga	1285	Perturbation theory and well-posedness in Hadamard's sense of hyperbolic initial-boundary value problems

Volume 22 Number 11

S. KHANFIR and L. LASSOUED	1309	On the existence of positive solutions of a semilinear elliptic equation with change of sign
I. RACHŮNKOVÁ	1315	On the existence of two solutions of the periodic problem for the ordinary second-order differential equation
C. Y. CHAN, L. KE and A. S. VATSALA	1323	Impulsive quenching for reaction–diffusion equations
J. V. BAXLEY and H. B. THOMPSON	1329	Nonlinear boundary value problems and competition in the chemostat
T.-C. LIM and H.-K. XU	1345	Fixed point theorems for asymptotically nonexpansive mappings
A. M. KRASNOSEL'SKII, M. A. KRASNOSEL'SKII, J. MAWHIN and A. POKROVSKII	1357	Generalized guiding functions in a problem on high frequency forced oscillations
S. SIMONS	1373	Subtangents with controlled slope
C. V. PAO	1391	Nonlinear elliptic systems in unbounded domains
K. VAJRAVELU, E. SOEWONO, R. N. MOHAPATRA and J. NAYFEH	1409	Second-order nonlinear systems arising in convection flow of a micropolar fluid
M. A. DEL PINO	1423	Positive solutions of a semilinear elliptic equation on a compact manifold
D. FORTUNATO, F. GIANNONI and A. MASIELLO	1431	Some results on lightlike geodesics on stationary Lorentzian manifolds

Volume 22 Number 12

T. HARA	1437	Notice on the Vinograd type theorems for Liénard system
T. AIKI	1445	Periodic stability of solutions to two-phase Stefan problems with nonlinear boundary condition
SHIN-HWA WANG	1475	On *S*-shaped bifurcation curves
MINGXIN WANG	1487	Existence of finite travelling waves for a nonlinear parabolic system
J. B. DE MENDONÇA XAVIER	1501	A priori estimates for the equation $-\Delta u = f(x, u, Du)$
B. ZHANG	1511	Boundedness in functional differential equations

K. T. ANDREWS and M. SHILLOR 1529 A parabolic initial-boundary value problem modeling axially symmetric thermoelastic contact

G. SAVARÉ and V. VESPRI 1553 The asymptotic profile of solutions of a class of doubly nonlinear equations

A. BOUCHERIF and B. A. SLIMANI 1567 On the sign-variations of solutions of nonlinear two-point boundary value problems

P. HAJLASZ 1579 Approximation of Sobolev mappings
